

An illustration of a person with dark hair, wearing an orange t-shirt and dark pants, sitting on a black floor. They are looking down at a laptop with a distressed expression. A blue rectangular notification bar with a white line is floating above their head. Several sheets of paper are floating around them: one white sheet with lines, one green sheet with lines, and one blue sheet with a line graph. There are also two color calibration charts (one with orange, red, and green squares; the other with black, white, and grey squares) floating in the air. The background is dark and minimalist.

## An Industry-Led DevOps Program Exclusively for Your College

[devopsjobready.netlify.app](https://devopsjobready.netlify.app)

# About Our Program

I Built to help you #SwitchToDreamJob

Career Camp is a one-stop solution for Final year college students and working professionals to land their dream job in a product based company as a Devops/ SRE **in just 2 months.**

Aayush Jhunjhunwala Co-Founder & Instructor

Devops/ SRE engineer in ORACLE and has done B.E. from Jadavpur University

Jayshree Prasad Co-Founder & Placement Manager

Career & Placement Manager with Experience in the learning domain and building businesses

# Program Overview

**Our DevOps Job Ready Program is a 2-month, weekend-based training that equips students with industry-demanded DevOps and Cloud skills. The program covers Git, Jenkins, Docker, Kubernetes, Terraform, AWS, and Monitoring tools, all taught through hands-on projects. By the end, students earn a certificate, real project portfolio, and placement-ready confidence.**

---

**1:1**

Personal  
Mentorship

**12+ weeks**

of guided learning

# Program Details

## Program Duration

2 Months

## Eligibility Criteria

Final Year Students, Bachelor's Degree holders and Working Professionals

**6-12 LPA**

Average package

**10+**

Industry-Grade  
Projects

# Content Delivery

## Structured

Thoughtfully designed curriculum for final year college students and professionals to help them emerge as confident tech professionals

## Blended delivery

Supplemented by course content released every week followed by pre-recorded videos + real-time 1-1 doubt resolution and 2 live sessions a week

## Industry-relevant

Devops is a growing industry which will not have AI replacement very late

## Hands-on

Projects and assignments designed to implement concepts and give hand on experience

# Course Module

## I **Linux & Git Basics**

Learn Linux commands, shell scripting, Git workflows, and core networking concepts to build a strong foundation.

## I **AWS Core Services**

Explore EC2, S3, IAM, VPC, and AWS CLI while deploying your first web application on AWS.

## I **Docker & Containerization**

Understand containers, images, Docker Compose, and best practices to containerize applications.

## I **Kubernetes**

Get hands-on with Kubernetes architecture, pods, services, deployments, and ingress for scalable apps.

## I **CI/CD with Jenkins**

Automate builds and deployments using Jenkins pipelines and GitHub Actions.

## I **Infrastructure as Code (Terraform)**

Learn to provision and manage AWS infrastructure using Terraform with IaC best practices.

## I **Monitoring, Security & DevSecOps**

Implement observability with Prometheus, Grafana, ELK stack, and apply security scanning.

# Course **Outcome**

-  **Upskill with industry practices and land your first tech job.**
-  **Switch to IT sector even from a non-tech background.**
-  **Get placement support with resume building and mock interviews.**
-  **Build live projects with mentors for real-world experience.**
